

gait2392 spinal cord - both sides + balance family

mechanical rig (pelvis springs, tether) = external, not part of the network

2.0 E ↔ E (weak)

4 F ↔ F (strong)

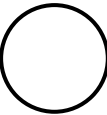

PF cells = phase windows; (tau, adapt)
shapes stagger their bursts

dashed: POST_i solved standing bias, per muscle

BAL fades with DRIVE (sagittal); LAT/TRK persist

left side identical
(RG cells shown, ghost)

trunk MNs =
ercspn / obliques

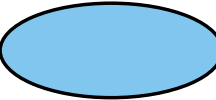

neuron

excitatory

inhibitory

muscle / MN pool
