Reduced Deng14 | full 14-neuron circuit

Fixed-h direct ODE reference, 350ms h; no physical afferents or whole-body connection.
Arrow/circle classification is relative to resting Vm. ODE gains retained.
Arrow: saved excitatory category. Open circle: saved inhibitory category.
Neuron colours: RG blue; PF green; motor salmon; afferent purple.
Dashed pentagons: boundary references, not additional neurons.
Edge numbers: gmax (uS). Full fields and IDs accompany each panel.
