W2L704_80 | connection overview

Saved W2L hybrid condition; source neuron interfaces shown, not 704 individual somas
Module links bundle actual edges; within-module edges are in expanded panels/tables.
Arrow: saved excitatory category. Open circle: saved inhibitory category.
Neuron colours: RG blue; PF green; motor salmon; afferent purple.
Dashed pentagons: boundary references, not additional neurons.
Edge numbers: gmax (uS). Full fields and IDs accompany each panel.
