
Supraspinal additions (future work)
Basal ganglia action and mode selection
Cerebellar adaptive gateway: gait gating and phase tuning
Vestibular and ocular sensing: IMU orientation, visual drift correction
descending commands
Spinal network (implemented, Ch. 6)
Two-level CPG: rhythm generator and pattern formation
Motor-neuron pools; Ia, Ib, and II afferents; heel and toe contact
body orientation and vision (future)
activation
proprioceptive and contact feedback
Body (demonstrated in hardware)
BPA actuators and robot body
