Submission audit: pending only

v9 | 31 October 2026 | Four groups | Latest handoffs checked

Resolved and rejected items are removed. Yellow marks work or decisions still pending. Earlier audit versions are preserved.

1. Choose the fetched circuit/recording for inclusion

The source-network SVG and reference comparison, plus the 108-neuron PF-pulse recording, were retrieved directly from easteregg2 and inspected. They are available for review; they are separate from the rejected agent drawings. Confirm the selected figure before replacing active manuscript artwork.

Retrieved: exact_LH.svg; LH_reference_comparison.png; canonical108 PF pulse, 3.4-7.8 s.

2. Native AnimatLab / platform-drop identity

The retrieved pulse recording is suspended MuJoCo W2L. It does not establish a native AnimatLab drop. The requested new handoff package was not yet present in easteregg2 Components at this check. Keep the source-model and support identities explicit.

Chapter 6 / Appendix D; CANONICAL108_STIMULUS_GRAPHS.md.

3. Optional remaining reviewer example

Leo S05 is closed: README and configuration verify the monthly-skimmer terms and manual curation. S09 still lacks a genuine AI-triage example; the personal speed/quality basis is already stated. Do not invent an example or a formal assessment protocol.

50-database.tex:27,71. A source example is optional follow-up.

4. Optional author choices

Your newly supplied abstract is applied verbatim, without the space-testing text. An extra phrase naming Gait2392 would strengthen the tools contribution; no extra claim was inserted. Background remains unchanged; its latest downloaded version differs only by corrected versus improved torque model.

02-abstract.tex:7; 15-background.tex:102.

All 58 Leo messages across 57 threads, including 14 later Chapter 6 comments, are individually accounted for in the consolidated ledger. Completed and rejected items are removed here. Abstract selection, contributions, monthly-skimmer wording, and Table 4.12 area weighting are completed. The paper remains parked. No Overleaf upload or commit.
