CAD robot: neural rhythm, contact handover, and ground stepping

RG voltage difference (relative mV)
R RG F minus E
L RG F minus E

PF voltage (relative mV)
PF_E1_r
PF_E1_l
PF_F1_r
PF_F1_l

MN voltage (relative mV)
R knee-flexor MN
L knee-flexor MN

Knee angle (deg) flexion negative
R knee
L knee

Normal force (N)
R measured
L measured
R planned
L planned

Whole-foot height (mm)
R mesh
L mesh
R target
L target

Contact confidence
R confidence
L confidence

Lift task (N) through muscles
R virtual lift task
L virtual lift task

Time (s)

SNS sets rhythm; the allocator supplies posture and swing-clearance MN currents.
Dashed planned loads are controller requests, distinct from measured ground forces.
