
Frozen W2L conductances: sensory-feedback comparison
Harness-supported model; feedforward support setting 0.25
Feedback intact
All sensory feedback disabled
Left
Right
Knee angle (deg)
Heel normal force (N)
Forward displacement (m)
Time (s)
Median bilateral contact phase: 0.498 cycles
Median bilateral contact phase: 0.223 cycles
Acceptance interval: 0.35-0.65 cycles; right condition outside interval
