CAD262 | the two neural pressure-controlled routes

Support085 mixed condition | only bilateral vas_med pair is expanded here.
Dashed blue arrows: engineering signal conversion. Pair POST current=0.
52 other routes retain external hybrid allocation and documented force floor.
Measured upward support87.3372%BW; guidance retained; not an all-BPA controller.
Arrow: saved excitatory category. Open circle: saved inhibitory category.
Neuron colours: RG blue; PF green; motor salmon; afferent purple.
Dashed pentagons: boundary references, not additional neurons.
Edge numbers: gmax (uS). Full fields and IDs accompany each panel.
