s3k · left sensory feedback into RG / PF

Muscle bundles are labelled by channel count; actual receiving interneurons stay explicit.

Ia
No direct RG/PF route

toe
No direct RG/PF route
in this saved condition

No direct Ia, II, Ib, heel, or toe
chemical projection into RG/PF
in this saved s3k standing condition.

A thick ×N line stands for N distinct source-muscle connections; the member list is in the companion key.

Triangles have their base on the receiving object. Filled circles are inhibitory terminals.

HC = half-centre · IN = interneuron · This is a wiring drawing, not a circuit run.
